

PROJECT HIGHLIGHTS

Europe & Eurasia

Host Institution: Institute of Art of the Polish Academy of Sciences

Host Country: Poland

Project Activities: The Fulbright Specialist shared expertise on drama therapy techniques for resocialization and cognitive behavioral change in incarcerated populations. This included delivering the keynote speech at a conference and leading workshops for educators, psychologists, and other penitentiary personnel.

Host Institution: National Research, Development, and Innovation Office

Host Country: Hungary

Project Activities: The Specialist, a chief intellectual property counsel at a large U.S. public university, conducted a seminar on change management and frameworks for more efficient knowledge transfer, research commercialization, and intellectual property management for university Technology Transfer Offices and leadership.

Host Institution: Kosovo Accreditation Agency

Host Country: Kosovo

Project Activities: The Specialist conducted a feasibility study, engaging stakeholders and collecting data to digitally transform accreditation and monitoring processes in higher education. They also provided recommendations to improve institutional alignment and transparency towards the goal of future membership in the European Network for Quality Assurance in Higher Education.

Host Institution: International University College of Turin

Host Country: Italy

Project Activities: The Specialist conducted a needs assessment of community-based organizations and local stakeholders impacted by increased migration of unaccompanied minors. They then developed recommendations for the host's community legal clinic to provide more child-centered legal and social services and training materials for minors' legal guardians on Italian legal protocols.

Host Institution: University of Iceland

Host Country: Iceland

Project Activities: The Specialist collaborated with University of Iceland and University of Akureyri to develop a clinical master's program in advanced practice psychiatric nursing. They also developed mental health simulations to to enhance clinical learning and provided recommendations to the University of Akureyri, a rural institution, to strengthen their rural mental health training and practice.
